PROFILE

User Interface Developer who blurs the line between design and programming. Excels at working in Agile, team-based environments and collaborating with designers and developers. Eager to learn new and modern technology that makes it simpler to build reusable and scalable UI components.

PROFESSIONAL EXPERIENCE

BSWIFT
May 2019 - Present

UX Developer

- Launched multiple client microsites totaling tens of thousands of users by constructing reusable and componentized UI elements based on given designs.
- Aided company to win largest client in history (The Home Depot) by building a showcase template for client proposal.
- Ensured cross-browser compatibility and accessibility by addressing browser-specific issues and following WCAG 2.1 standards.
- Solutioned for new projects and company platforms through attending planning meetings and workshops.

WUNDERLAND GROUP
Mar. 2019 - Apr. 2019

Freelance Front End Developer @ Movéo

- Lightened agency's client workload by building WordPress templates using HTML, CSS (SCSS and animation), and PHP.
- Facilitated client communication to subscribers with updates to email blasts.

LEO BURNETT WORLDWIDE
June 2017 - Dec. 2018

Junior Web Developer

- Assisted major clients (Allstate, Intel, Kellogg's, The Field Museum, Dunkin', etc) in completing successful marketing campaigns by utilizing efficient CSS and JavaScript to build and update projects.
- Broadened horizons by being exposed to a variety of front end technologies and code bases including React, Angular, Vue, WordPress, and Adobe Experience Manager.
- Interviewed and screened intern- and junior-level candidates.
